

Great cabinets that are ideal for storing all of our valuable documents.

A happy customer

CONNECTING 42U

A Connecting 42U is essentially two 21U cabinets that stack securely with cable entry between the two units.

Therefore a 42U capacity unit can now be installed in areas that have previously been impossible due to space limitations, tight staircases or small doorways etc.

The Connecting 42U can function as two separate units and are individually locked. The units are available in front only, or front and rear door models.

The full Templar range is available with a choice of high security locks.
