

SPLIT 42U

A Split 42U is essentially formed from two 21U cabinets that are stacked and bolted on site to produce a standard 42U rack cabinet. This arrangement allows full use of the whole height of the 42U racking as the interface between the two is fully open.

Therefore a 42U capacity unit can now be installed in areas that have previously been impossible due to space limitations, tight staircases or small doorways etc.

The Split 42U unit may only function as one secure container since the aperture between the two is open (they cannot be used unstacked).

The units are available in front only, or front and rear door models. The full Templar range is available with a choice of high security locks.

Technical Specification:

Security Classification: Approved
Size: 2050mm (H) x 700mm (W) x 1000mm (D)
Approx. Weight: 225kg
Order code: 2DC-42U / Split

Furniture is approved to all bespoke sizes.

Thank you for delivering on the specific date required. The delivery team were extremely professional in their approach with all units put into place smoothly.

A happy customer
