

P-Pack In-Line RCBO

RCBO protection for modular desk power systems

P-PACK PF/20/G shown

KEY FEATURES

- For new or existing P-Pack systems
- 16A, 30mA Type C RCBO
- GST female output on both models
- GST or 20mm gland-hole input
- Connects to compatible desk units
- In-line protection in a compact unit

Add in-line RCBO protection to a P-Pack under-desk or desktop power installation. Two input options suit either standard GST-connected leads or a tap-off lead from a bus-bar or underfloor electrical track system.

Standard models

Part number	Input connection	Output connection
P-PACK PF/G	GST male input	GST female output
P-PACK PF/20/G	20mm gland hole with connecting block	GST female output

Both models provide 16A, 30mA Type C RCBO protection.

Choose the input for your installation

P-PACK PF/G | GST input

For use with standard START and INTER leads. The GST input / output unit fits in-line within a compatible desk power circuit supplied from a 13A wall or floor-box socket, including an under-desk unit where used.

P-PACK PF/20/G | Tap-off lead input

For bus-bar and underfloor electrical track systems. The tap-off lead enters through the 20mm gland hole and is wired to the connecting block. The GST female output connects to a P-Pack desktop unit or another compatible under-desk unit.
