

P-Pack Surge Protection

In-line protection for desk power systems

KEY FEATURES

- 1,800J surge suppression
- 3-pole male input / female output
- Three status indicators
- 200mm earth lead
- ABS enclosure
- Retrofit to compatible systems

The P-Pack in-line surge module connects between a START mains lead and compatible under-desk or desktop units using INTER leads. It provides differential and common-mode surge protection for the connected installation.

Standard models

Part number	Description
P-PACK SURGE 1800J	In-line surge module; 140 x 62 x 42mm

Technical specification

Specification	Details
Surge suppression	1,800 joules
Maximum surge	6500A
Maximum load	250V, 13A
Clamping voltage	775V
Response time	1 nanosecond
Attenuation	Up to 50dB
Source material reference	UL 94V-0 (printed as UL 94VO in the source)

Status and compatibility

Green: power present. Yellow: surge protection active. Red: live / neutral reversal. For compatible BS 6396 desk power installations using matching 3-pole START and INTER leads.
