

KOLDLOK MINI SPLIT INTEGRAL GROMMET

Part Number: 46-1000-10077

PRODUCT OVERVIEW

The KoldLok Mini Split Integral is a compact raised-floor grommet for small cable openings in new or existing data centre floors. Its split frame allows installation around existing cabling, while angled brush filaments provide an effective seal against bypass airflow.

FEATURES

- Designed to seal small 4 x 6 inch (approximately 100 x 150mm) cable openings.
- Single layer of angled brush filaments for effective sealing around installed cables.
- Split design enables installation around existing cabling.
- Compact size offers flexibility where multiple cable opening sizes are present.
- Contains no loose or partially fastened parts that can fall through the raised floor.
- Impact resistant and durable.
- RoHS compliant and designed to self-dress raw metal edges of floor-tile openings.

TECHNICAL SPECIFICATION

Description	Specification
Overall size	195 x 144 x 38mm
Usable cable area	127 x 64mm
Typical opening sealed	Approx. 100 x 150mm (4 x 6 inch)
Application	New or existing raised-floor cable openings
Finish	Black

BENEFITS

- Reduces bypass airflow and helps improve data centre cooling efficiency.
- Supports improved static pressure and delivery of conditioned air.
- Cost-effective option for separating smaller power and data cable routes.
