

SafeStor NPSA Security Cabinets

UK-manufactured high-security storage for sensitive documents, equipment and protected items

Project-led secure storage, specified to suit your requirement.

SafeStor cabinets combine a fully welded steel carcass, flush-fitting steel doors, multi-point locking and adjustable shelving. Data Room Direct can help confirm the cabinet size, shelving, locking and installation requirements for each project.

Current cabinet sizes:

1180mm or 2220mm high
900mm or 1000mm wide
470mm deep

Made to order in the UK.

Technical Specification

Construction	1.5-3mm CR4 steel; fully welded carcass and structural components
1180mm cabinet	2 adjustable shelves / 3 storage levels
2220mm cabinet	5 adjustable shelves / 6 storage levels
Shelf loading	Maximum 100kg per level shown on current drawings
Lock options	Kaba 252, Kaba Auditcon 552, Manifoil MK8 or ILS Scroll Lock
Finish	RAL9002 Grey White shown on current drawings; alternatives available by project
Delivery / installation	Quoted individually; subject to site survey, access and final specification

Locking Options

Kaba 252: 8-digit code, up to 20 users and 100-event audit trail. **Kaba Auditcon 552:** 8-digit code, up to 99 users and 400-event audit trail. Manifoil MK8 and ILS Scroll Lock options are also available. Certain lock types and security requirements require further approval at point of order.

NPSA & Security Requirements

SafeStor is available for projects requiring NPSA-listed secure storage. The exact cabinet size, lock type, end-user status and required security level must be confirmed before order. Some configurations require additional approval and delivery may need to be made directly to the approved customer.
