

RackSEAL Air Barrier

Expanding foam tape for rack airflow control

600 / 800mm

Suitable rack widths

Self-adhesive

Acrylic scrim backing

2.6m / 3.3m

Available roll lengths

Close the gaps that blanking panels leave

Pre-compressed foam tape expands to seal spaces beside mounting rails, between cabinets and beneath racks. It conforms around cables to reduce paths for hot exhaust air to return to the front of IT equipment.

Key features

- Slow expansion for fitting around cables.
- Self-adhesive acrylic scrim backing.
- Black foam with very low particle shedding.

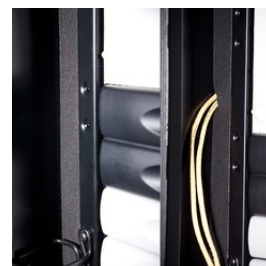

Available sizes

Part number	Tape width	Expanded depth	Roll length
41-25050	25mm	48mm	3.3m
41-40125	40mm	120mm	2.6m

Operating temperature	-30°C to +130°C
Fire classification	Class B1 to DIN 4102-1
Composition	Free from chlorinated compounds, CFCs and halogens

Expanded foam seals beneath a rack.

Seals the space beside the mounting rails.
